

Anti-Goat IgG (Agarose Conjugated) Secondary Antibody
Rabbit Polyclonal, Agarose
Catalog # ASR3147**Specification**

Anti-Goat IgG (Agarose Conjugated) Secondary Antibody - Product Information

| | |
|-------------------|--|
| Description | Anti-GOAT IgG [H&L] (RABBIT) Antibody |
| Host | Agarose Conjugated |
| Conjugate | Rabbit |
| Clonality | Agarose |
| Physical State | Polyclonal |
| Host Isotype | Suspension of agarose beads |
| Buffer | IgG |
| | 0.02 M Potassium Phosphate, 0.15 M |
| | Sodium Chloride, pH 7.2 |
| Species of Origin | Rabbit |
| Preservative | 0.01% (w/v) Sodium Azide |

Anti-Goat IgG (Agarose Conjugated) Secondary Antibody - Additional Information**Shipping Condition**

Wet Ice

Purity

Anti-Goat IgG [H&L] (Rabbit) Antibody Agarose Conjugated is an IgG fraction antibody coupled to activated agarose. Sufficient antibody capacity is provided to bind a minimum of 5 mg of pure Goat IgG.

Storage Condition

Store Anti-Goat IgG [H&L] (Goat) Antibody Agarose Conjugated vial at 4° C prior to opening. DO NOT FREEZE.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Anti-Goat IgG (Agarose Conjugated) Secondary Antibody - Background

Anti-Goat IgG [H&L] (Rabbit) Antibody Agarose Conjugated is generated in goat and detects specifically Goat IgG heavy and light chains. This anti-Goat antibody is suited for immobilization in a packed column for removal of Goat IgG from solution. Immunoglobulin G is the most abundant antibody isotype found in the circulation. IgG molecules are synthesized and secreted by plasma B cells. IgG antibodies are large molecules of about 150 kDa composed of four peptide chains. It contains two identical class γ heavy chains of about 50 kDa and two identical light chains of about 25 kDa, thus a tetrameric quaternary structure. Anti-Goat IgG [H&L] Antibody is ideal for investigators in Cancer, Immunology, and Microbiology research.
